Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

docketing@oshaliang.com

buta@oshaliang.com

Office Action Summary

Application No.

10/589,147

Applicant(s)

SUNAGA ET AL.

Examiner

Andrew K. Bohaty

Art Unit

1794

Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3 and 5-7 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-3 and 5-7 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 11 August 2006 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/GC/08)
- 4) ☐ Interview Summary (PTO-413)
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: ____
- Paper No(s)/Mail Date 2006/08/11; 2007/01/25

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
 2. Ascertaining the differences between the prior art and the claims at issue.
 3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
3. Claims 1-3 and 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aurelie et al. (WO03/048225), where Treacher et al. (US 2004/0260090) (hereafter "Treacher") is used as the English equivalent, in view of Son et al. (US 2003/0094595) (hereafter "Son") and applicants' admitted prior art (hereafter "AAPA").
4. Regarding claims 1-3 and 5-7, Treacher teaches polymers comprising the

following monomer unit, and teaches the polymer is used as a light emitting material in an electroluminescent device (Table 1, paragraphs [0108] and

[0135]). Treacher further teaches that the amount of impurities, including inorganic substances, including metals such as Pd, found in the polymers should be as possible and the impurities can be removed by a variety of different means (paragraph [0090]). Treacher teaches that impurities, such as Pd, cause impairments in the light emitting device and the impurities should be removed (paragraph [0068]).

5. Treacher does not specifically teach the amount of the impurities in the polymer and is silent in the presence of Cl.

6. Son teaches fluorene containing polymers that can be used in the light emitting layer of a light emitting device (Fig. 1 and 2 and paragraphs [0080] and [0081]). Son further teaches the polymer contains impurities and the impurities need to be removed from the polymer (indicating the polymer should contain as little as the impurities as possible) (paragraph [0009]). Son teaches that removing the impurities improves the performance of the light emitting device (paragraph [0009]). Son is silent on the types of impurities.

7. AAPA teaches that polyfluorenes contain impurities and these impurities includes inorganic impurities such as metal elements including sodium, nickel, and palladium and other inorganic impurities such as chlorine (page 2 second to last paragraph of the specification). AAPA further teaches that these impurities reduce the performance properties of the light emitting device they are used in (page 2 last paragraph of the specification).

8. Given the teaching of Treacher, Higashi, and AAPA, it would have been obvious to one of ordinary skill in the art at the time the invention was made to remove the

impurities from the fluorene containing polymers, to where the sum of the metals is less than the amount of chlorine. It would be obvious to reduce the amount of chlorine to be 50 ppm or lower. The motivation would have been to increase the performance properties of the light emitting device.

9. Furthermore, Treacher, Son, and AAPA teach that metal impurities, such as Pd, and halogens, such as Cl, are not good for organic light emitting materials when found in these materials as materials and the amount of these materials should be reduced as much as possible. It is well known that both the metal and Cl components are bad and there is legal precedent, that purer forms of known products may be patentable, but the mere purity of a product, by itself, does not render the product unobvious, *Ex parte Gray*, 10 USPQ2d 1922 (Bd. Pat. App. & Inter. 1989). Since the applicants do not provide any secondary evidence of unexpected results for the purified polymer and claim a purer form of a known product, the claims are not unobvious over the prior art and are not patentable.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

11. Shinohara et al. (US 2005/0012450) discloses the removal of impurities from light emitting materials to improve the efficiency of light emitting devices using the material.

12. Higashi et al. (US 6,617,051) discloses the removal of halogen containing materials from the polymers in order to improve the luminescent properties of the light emitting device.
13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew K. Bohaty whose telephone number is (571)270-1148. The examiner can normally be reached on Monday through Thursday 7:30 am to 5:00 pm EST and every other Friday from 7:30 am to 4 pm EST.
14. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, D. Lawrence Tarazano can be reached on (571)272-1515. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
15. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
